PROFESSIONAL PROJECTS

Enterprise Banking Risk Management Analytics Solution | SQL Server, Power BI, Python, Machine Learning

github.com/nedaaalgdawy-svg/Enterprise-Banking-Risk-Management

- Collaborated on an end-to-end banking risk analytics capstone for Team Risk Wise (DiGiLiANS, September 2026), combining loan, customer, repayment, collection, and risk-event data.
- Applied Bronze-Silver-Gold SQL data architecture and a dimensional Power BI model to support consistent reporting and risk KPIs.
- Built and presented five interactive dashboards covering portfolio exposure, delinquency/default, risk drivers, collections/recovery, and predictive risk segmentation.
- Analyzed a 30,000-loan portfolio; highlighted an 8.57% default rate, approximately 20.8% delinquency, and 4,202 high-risk loans; integrated prototype default prediction and risk segmentation.

Business KPI Dashboard | Power BI, DAX, Power Query, Excel

- Developed an executive dashboard, Power Query ETL workflows, relational data models, reusable DAX measures, and operational/financial KPI reporting.

Coffee Shop Sales Analytics | Excel, Power Query, Pivot Tables

- Analyzed transactions, product margins, buying patterns, and sales seasonality; cleaned source data and built dynamic dashboards with actionable recommendations.

PROFESSIONAL EXPERIENCE

Data Analytics & Business Intelligence Intern - DiGiLiANS, Digital Pioneers Initiative | 2026

- Completed intensive practical training in SQL, Python, Power BI and Excel, including data cleaning, ETL, data modeling and KPI reporting.
- Collaborated on an end-to-end banking risk analytics capstone, building interactive dashboards for loan portfolio, delinquency, collections and predictive risk insights.
- Presented findings and actionable business recommendations using analytical reports and visual storytelling.
